SCANIA Tetra Pak® postnord

HOW WE WORK

The right expertise for your needs

We combine established specialist networks with active candidate sourcing – locally, across the Nordics and globally.

01

Targeted search

We identify relevant candidates locally and across selected Nordic and international markets, actively searching for specialists who match your requirements.

02

Contact & evaluation

We assess candidates' technical experience, qualifications, availability, interest and suitability for the role.

03

Candidate presentation

We present qualified candidates and support you throughout interviews and the selection process.

04

Contracting, relocation & start

We coordinate the process from candidate selection to employment or assignment start, including contracts, international mobility, relocation and practical arrangements when needed.

REQUIREMENT PROFILE

Struggling to find the right expertise for a position or assignment?

Let us widen your search. Send us your job or assignment description – with no obligation. We explore the options and come back with matching candidate profiles.

A selection of client assignments

TELECOMS

Huawei – PhD-level R&D specialists in Sweden since 2011

Since 2011, we have provided specialist expertise for Huawei's research and development operations in Sweden. Through targeted search and international recruitment, we have found candidates in network architecture, base stations, 5G, power electronics and mechanical engineering.

RETAIL & TECHNOLOGY

H&M Group – tech talent acquisition and engineering functions

We supported H&M Group in two projects: strengthening their Tech Talent Acquisition function by sourcing highly skilled tech TA professionals, and establishing engineering functions for one of their domains.

AUTOMOTIVE

Scania – senior IT specialists for business-critical systems

We have provided Scania with senior IT specialists to support the development and ongoing enhancement of business-critical IT environments. The assignments cover both application operations and software development.

LOGISTICS

PostNord – remote IT specialists

Remote consultants employed through our own company in India, working as an integrated part of PostNord's IT teams.

PACKAGING & FOOD TECHNOLOGY

Tetra Pak – remote IT specialists

Remote consultants employed through our own company in India, supporting Tetra Pak's teams with qualified specialist expertise.

GREEN STEEL

Stegra – specialists for green steel production

Consultants supporting Stegra as it builds large-scale green steel production in northern Sweden.

TELECOMS

Nokia – wireless communications specialist since 2017

Since 2017, our wireless communications specialist has supported Nokia from Espoo, Finland – mainly remotely – with radio equipment regulation and the use of the electromagnetic spectrum. The specialist is employed by Co-Worker, which handles all formalities so that the work can be fully in focus.

ELECTRO-OPTICS

Aimpoint – technical specialists

Specialist consultants supporting Aimpoint, the Swedish developer and manufacturer of electro-optical sighting systems.

LIFE SCIENCES

Global life sciences company – data science and AI

We provided senior specialists in data science and full-stack development to a global life sciences client. The assignment covered machine learning, data engineering and secure software development in a regulated environment – from predictive modelling to scalable, cloud-based analytics.

BATTERY MANUFACTURING

Northvolt – more than 40 consultants for the production scale-up

On previous assignments for Northvolt, we placed more than 40 consultants to support the scale-up of large-scale battery production. Through international search, we identified candidates with specialist expertise in automation and production engineering.

TESTIMONIALS

What our clients say

"A partnership with Co-Worker delivers results. They identify and attract qualified candidates quickly, which helps us get new business initiatives up and running.

August Dahl
Business Manager, A-Society Group

"Fast to respond, on-point information, transparent – all the things you would hope for in a supplier. I would warmly recommend Co-Worker to anyone in the industry.

Ava Fard
Consultant Manager, Huawei Technologies R&D

"Co-Worker Technology has proven to be an invaluable asset in our talent acquisition. Their commitment to time efficiency, exceptional quality and rapid execution has consistently motivated me to engage with them once more.

Ranjith Engu
Global Talent Acquisition Manager, H&M Group
